

Oxygen Sensor OOI103

Use the advantages:

- Accurate and reliable response
- Excellent selectivity against CO₂
- Excellent signal stability
- High product quality
- Short delivery times
- Technical support
- Made in Germany
- Certified quality management system
- 15 months warranty (without battery)
- Designed for EnviteC Oxygen Monitor OxiQuant S

„We keep your devices operating at their best.“

EnviteC has been developing and manufacturing highly specialized products for medical applications and innovative products within the gas measurement technology for environmental, industrial and safety applications.

The company trusts in the quality of advanced production methods and processes. The result are oxygen sensors for industrial gas analysers, which share the same extraordinary quality, excellent signal stability and reliable response for accurate readings. These sensors for measuring the partial pressure of oxygen are designed to be used in devices for monitoring gas supply equipment in industry and hospitals (not for personal protection nor for monitoring medical breathing air in direct contact with patients). EnviteC's research and development activities are consistently aligned to customer and market needs – identification and optimization of sustainable product solutions are the main concerns of the company.

From standard sensors to customized sensors

Experienced EnviteC engineers analyze customer requirements. This input is used for different standard and OEM applications, and ongoing support is provided right up to the final integrator in the solution. EnviteC designs customized sensors characterized by a maximum possible degree of precision.

We look forward to assisting you either on the phone or in a personal talk.

Mechanical drawing (All dimensions in mm)

General tolerances ISO 2768-c

Technical Specifications OOI103

Measurement range	0 % ... 100 % oxygen (at atmospheric pressure)
Output in ambient air	9 mV ... 15 mV
Electrical interface	Gold plated slip rings (3.2 V battery built-in for OxiQuant S)
Repeatability	< 1 % volume O ₂ at constant temperature and pressure
Linearity error	< 3 % relative
Response time	< 13 s to 90 % of final value
Zero offset voltage	< 200 µV in 100 % nitrogen
Cross interference	< 0.1 % vol. O ₂ response to: 15 % CO ₂ balance N ₂ ; 10 % CO balance N ₂
Influence of humidity	-0.03 % rel. per % RH at 25 °C
Pressure range	0.6 bar ... 2 bar (ppO ₂ 0 ... 1250 mbar O ₂)
Influence of pressure	proportional to change in oxygen partial pressure
Influence of mechanical shock	< 1 % relative after a fall from 1 m
Operating temperature	0 °C ... +50 °C
Temperature compensation	built-in NTC compensation
Effect of temperature compensation (steady state)	between +25 °C and +40 °C: 3 % relative error between 0 °C and +50 °C: 8 % relative error
Operating humidity	0 % ... 99 % RH non-condensing
Long term output drift	< 1 % volume oxygen per month typically < -15 % relative over lifetime
Storage temperature	-20 °C ... +50 °C
Recommended storage	+5 °C ... +15 °C
Warm-up time	< 30 minutes, after replacement of sensor
Weight	approximately 45 grams
Part number	01-00-0095

All specifications are applicable at standard conditions:
1013 hPa, 25 °C dry ambient air

Certified Quality Management

EnviteC is maintaining a quality management system, which meets the requirements of EN ISO 13485 for medical devices.
